

Achievements to date

Validation of the needs and requirements for the development of capacities in every niche.

Approaching of the niche stakeholders to the potential satisfiers identified in the need evaluation.

Acknowledgement of the importance of functional capacity development for the integration of Innovation Systems by the niche stakeholders.

Institutional strengthening of the different units of the Agriculture, Livestock and Food Ministry, that are part of the Agricultural Innovation System, especially those who serve as a bridge and those with political character, through dialogues among and within each institution.

Involvement of the CDAIS Project in the National Innovation System, put together by the National Bureau of Science and Technology.

Establishing exchange relationships between public, private and academic institutions involved in innovation.

Development of Coaching Plans in all four niches, containing themes, subjects, activities, stakeholders and chronograms in the learning cycles for each of the niches.

Next steps

10/2017				11/2018
After the validation of the coaching plans, the Reflection and Learning Cycles will start at niche level.	The organizations to be strengthened will be selected by the advisory committee, taking into account the added value for the niches and their impact at the national level	Reflection and Refinement meetings will be held in order to analyze the activities and correct potential mistakes in conducting the activities.	Reinforcement of the regional facilitators' network by a joint workshop with Honduras.	Comparison of the results achieved, benefitting from the lessons learnt in two out of eight countries involved in CDAIS project.
